

## Running COPES for Android using Dolphin Browser

1. Download and install the Dolphin web browser from Google Play Store.
2. After Dolphin browser is installed, go to the device's security settings (accessible from the main / home screen) and set permissions as "**ON**" - to allow installation of applications from unknown sources
3. After above process is over, start Dolphin browser.
4. Visit this link <https://dolphin.com/lab/en/> on dolphin browser. Download and install Flash Player from the list.
5. Please note: there maybe instances where Dolphin Browser or Flash Player has not been installed. As such you may have to check from the Play Store file / pending installation list whether the file download installation has been interrupted or is pending and restart the same.
6. Important: successful installation of Dolphin browser and Flash player will display both the Icons as below on your android system screen.

Note: Showing of both icons is very important, if both icons as below are not showing, then you may have to recheck device settings / play store installation list / File Manager Pending list or seek technical help to install both these systems as per the steps given above. Both the icons might not be place side-to-side as showing below. They can be in different screens of your android device.

7. If both the icons are showing properly then, Start Dolphin Browser and go to settings in Dolphin browser by clicking on the small Dolphin icon
8. Important: Inside settings - tick on the option "Dolphin Jetpack for Flash". This option has to be Green/ON.
9. Important: Inside settings - set "Flash Player" to "Always on". This option has to be Green/ON.
10. You may now exit the browser and restart your device
11. Once the device has restarted, you are all set and can operate **COPES** using Dolphin browser.
12. Go to [www.seaspancopes.com](http://www.seaspancopes.com) on dolphin browser and select "Seafarers option". Login with your COPES ID / Password.

Tip: You can bookmark COPES on Dolphin by clicking on the star icon on the left side of Dolphin Browser.
